

Data Sheet / Specification

Terracoir 900 Netting

	Terracoir 900
Fabric Type	Flat fabric made of coir with hand twisted yarn
Material	100% Coir
Weight	900 g/m ²
Presentation	Rolls
Width	2 m
Length	50 m
Area	100 m ²
Weight / Roll	90Kg
Ends per 10 cm	10
Picks per 10 cm	10
Mesh size	Approx' 10mm x 10mm
Thread tensile strength - Warp	Approximately 39Kn / m
Extension	Approx' 20%
Open area	Approx' 40%

- Provides surface stability to steep and aggressive applications, such as water courses, high wind exposure, etc.
- Slows water run off and provides excellent silt collection to water course embankments which aids natural vegetation and long term embankment regeneration.
- Simple to install and allows for planting through the mesh matrix.
- Provides shade and protection from the sun and drying effect of the winds to assist in the establishment of grasses and to reinforce the root system until it has reached full bio-mass.

The specifications presented herein are to the best of our knowledge true and accurate. Terraqua cannot guarantee or warranty our products, unless agreed to in writing for specific conditions, for performance since the manner of handling; use and installation are beyond our control.

We cannot warrant our products to perform under unlimited circumstances due variables such as soil conditions, manner of installation and particularly severe weather conditions. Satisfactory results may not meet your expectations. No one can guarantee that required moisture will occur to permit growth after seed germination. We will not be liable for damages or losses, direct or indirect, of our Terracoir Range of Products due to the above reasons.
